DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8 and 13, drawn to transfer material with polyamide-imide light to heat conversion layers.

Group II claim(s) 9 and 11, drawn to transfer materials with visible light reflectance stability in the transfer layer.

Group III, claims 10 and 12, drawn to transfer materials with hue stable color transfer layers. Groups I-III are classified in 430/200.

... . The groups are drawn to independent inventions wherein groups II and III do not require the conversion layers of Group I; Groups I and II do not require the hue stable colors of group III and groups I and III do not require the transfer layers of group II with its reflectance properties. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
